

CHALK PAINT

Acrylic Copolymer Dispersion

Description

A ready for use decorative coating for interior and exterior surfaces. This product has a very high filler (chalk) loading and a paste like viscosity. Product provides a high solids protective film which may be sanded to provide the desired finish. Polishing of the sanded surface provides a rich, attractive and unique finish that provides protection to the underlying substrate.

Recommended Uses

As a final coat on to a variety of substrates including PVC, wood, cementitious, previously painted surfaces and primed metal.

Technical Data

Viscosity @ 25°C	105 Krebb Units
Opacity @ 120 Micron	0.98
PH	9
S.G.	1.7 kg/l
Freeze Thaw Stability	Pass
Drying time:	Touch dry 45 minutes @ 23°C Recoating time 2½ hours @ 23°C Fully cured 4 days
Coverage Approximately	5 m ² /l per coat

CLEANING

Clean equipment with water

SURFACE PREP

Clean, sand, dust

APPLICATION

Brush
