

POLYURETHANE VARNISH

Durable Clear Coat

Urethane Alkyd

Description

A hard wearing polyurethane varnish with outstanding hardness and abrasion resistant properties. Available in either a gloss or a suede finish.

Recommended Uses

Use in areas where high volumes of traffic is expected. Product works well on all types of wood and specifically wood floors. If the substrate is porous a 60/40 blend with turpentine is recommended as a sealer before application of the final two coats.

Technical Data

Consistency @ 25°C (Ford cup no. 4)	1 min. 15 sec.
Drying time	4 hours
Touch dry:	9 hours
Hard dry:	24 hours
Fully cured:	Very good
Adhesion	Clear
Colour	Excellent
Resistance to cold water	Reasonable (Avoid high aromatic solvents)
Resistance to solvents	0.91kg/l
SG	11 m ² /l per coat
Practical spreading rate on sealed wood	47 microns
Recommended dry film thickness	(2 coats applied at 70 microns wet film thickness each)

CLEANING

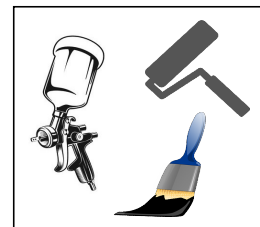

Clean equipment with turps

SURFACE PREP

Clean and sand if necessary

APPLICATION METHOD

Roller
Brush
Spray
