

GALVANISED IRON CLEANER / DEGREASER

Multi Purpose Cleaner

Phosphoric Acid Base

Description

A product formulated to dissolve oils and grease as well as neutralise rust on old galvanised iron and steel. This makes the product an excellent cleaner for floors and metal to be applied before painting commences.

Recommended Uses

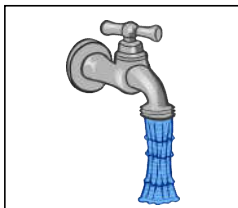

Old, rusting galvanised iron and steel should be treated to neutralise and remove the rust before applying the primers.

New galvanised iron sheets should be washed with the Galvanised Iron Cleaner to ensure good adhesion of the Acrylic Corrocote and Universal Acrylic Roof paint. Dirty concrete floors should be treated before painting.

Technical Data

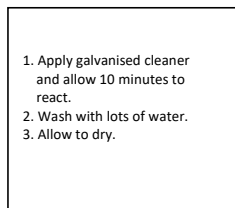

Base	Acidic
S.G.	1.1kg/l
Viscosity	Low, water like viscosity
Colour	Clear
Solvent	Alcohol / water

CLEANING

Water

SURFACE PREP

APPLICATION METHOD

Cloth or Mop
