

## GLOSS VARNISH

### Smooth Gloss Film

Long Oil / Natural Resin

#### Description

A durable, smooth gloss varnish that is easy to wash and clean.

#### Recommended Uses

Suitable for use on all interior wood surfaces where a gloss finish is desired. On porous wood a 60/40 blend with turpentine is recommended as a sealer before applying the final coats.

#### Technical Data

Consistency at 25°C	1 min. 30 sec (Ford Cup no 4)
Drying time	2 hours
Touch dry:	7 hours
Hard dry:	
Adhesion	Very good
Colour	Clear
Resistance to cold water	Very good
Resistance to solvents	Reasonable (Avoid high aromatic solvents)
Specific Gravity	0.90kg/l
Practical spreading rate on sealed wood	11 m <sup>2</sup> /l per coat
Recommended dry film	55 microns (2 coats applied at 70 microns wet film thickness each)

#### CLEANING

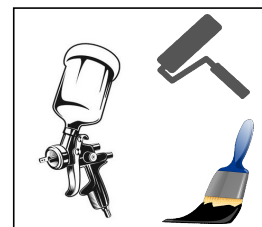

Clean equipment with turps

#### SURFACE PREP

Clean the surface and sand if necessary

#### APPLICATION METHOD

Roller  
Brush  
Spray
