

Q.D. PRIMER RED OXIDE GX

RUST PREVENTING PRIMER

Short Oil Alkyd

Description

An economical smooth, matt quick drying primer providing excellent adhesion to steel surfaces. The paint provides protection to steel and prevents rust formation. Compatibility of the final coat needs to be checked before application.

Recommended Uses

As a primer coat onto cleaned steel surfaces.

Test Results

Fineness of grind	40 micron
Consistency at 25°C	1 min 30 sec - Ford cup no 4
Drying time: Surface dry	5 - 10 minutes
Hard dry	4 hours
Wet hiding power	8 m ² /l
Adhesion	Excellent if substrate preparation is carried out properly
Appearance	Matt finish
Flexibility	Pass (Conical mandrell)
Resistance to solvents	Good (aromatic solvent > 70% should be avoided)
Specific gravity	0.94 kg/l
Impact resistance	Pass

CLEANING

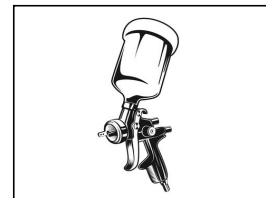

Clean equipment with QD Thinners

SURFACE PREP

Degrease + treat surface with appropriate cleaner

APPLICATION METHOD

Spray

Figures represent approximate values.
