

## SANDING SEALER

### Smooth Wood Primer

Modified Acrylic Solution

#### Description

A low viscosity cloudy liquid with quick drying properties. Product is unique due to special ingredients that make easy sanding possible.

#### Recommended Uses

As a first coat onto wood surfaces that requires a smooth, professional finish. After allowing 1 hour drying, the product can be sanded to a smooth, even surface. This provides an excellent base for top coats, lacquers or varnishes. 1 coat is normally sufficient.

#### Technical Data

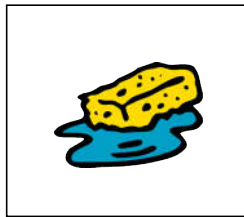

Approximate spreading rate	7 m <sup>2</sup> /l depending on substrate porosity
Drying time	8 min @ 23°C
Touch dry	1 hour @ 23°C
Hard dry	0.95 kg/l
S.G.	1 minute Ford Cup no 4
Viscosity @ 23°C	Excellent
Resistance to water	

#### CLEANING

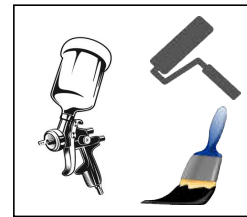

Clean equipment with Xylene

#### SURFACE PREP

Clean the surface

#### APPLICATION METHOD

Roller  
Brush  
Spray
